Executive Summary

I am a B.Tech student at VIT-AP University with a CGPA of 9.02, passionate about software development and backend engineering. With hands-on experience in building impactful projects — including a face recognition application using python and Query vault using vector databases and JavaScript — I have strengthened my skills Java, Python, MySQL, and data structures and algorithms. My problem-solving abilities are highlighted by my competitive programming journey, ranking in the top 6.9% on LeetCode with 475+ problems solved. Eager to contribute to innovative backend solutions and optimize system performance.

Skills

- **Programming Languages:** Java,python
- **Web Development:** Spring Boot(beginner)
- **Problem Solving:** Data Structures, Algorithms, Competitive Programming (LeetCode,GeeksForGeeks)
- **Tools & Technologies:** Git, Postman
- **Databases :** MySQL, MongoDB

Projects

- **Face Recognition Attendance System** — Developed a face recognition-based attendance system, leveraging machine learning algorithms to automatically detect and mark attendance, streamlining the process for improved accuracy and efficiency.
- **Query Vault RAG**— An intelligent document QA system that enables users to query large collections of contracts and documents. Built with NLP, embeddings, and a vector database, it delivers ~40% higher accuracy and 60% fewer hallucinations compared to normal chatbots, ensuring precise and efficient information retrieval.

Achievements

- Ranked in the **top 6.9%** on LeetCode, solving a wide range of data structure and algorithm problems.
- Solved **475+** problems on LeetCode, with a ranking of 167,011.
- Solved 300+ problems on geeks for geeks

Education

- **VIT-AP University** — B.Tech (Ongoing)
CGPA: 9.02(after 5 semesters)
- **Narayana Junior College** — Intermediate
Percentage: 98.3%
